

Introducing glycoZoo™

Shampoo, Conditioning Spray, Wet Wipes/Dry Bath & Otic

A Safe & Effective Formulation

INDICATIONS:

glycoZoo™ Shampoo & Conditioning Spray

USES: Maintenance; Aids in the topical treatment of seborrhea complex and other conditions where a broad-spectrum shampoo with Glycolic Acid and/or Boric Acid may be beneficial. Ceramides aid in restoring moisture to dry and damaged skin.

Shampoo: Available in 8 ounce and 1 gallon bottles
Conditioning Spray: Available in an 8 ounce bottle

REFERENCES

¹Choi, M.J. and Maibach, H.I. (2005). Role of ceramides in barrier function of healthy and diseased skin. *Am J Clin Dermatol*, 6 (4), pp. 215-23.

INGREDIENTS: 2% Boric Acid & 2% Glycolic Acid with Ceramides.

BORIC ACID: Drying, aids in treatment of topical fungal and bacterial diseases

GLYCOLIC ACID: Keratolytic: smoothing and softening the skin; Lipolytic; Epidermotrophic;* Improved over older alpha-hydroxy acid (lactic) formulations.

CERAMIDES: Aid in moisturizing, repairing, and restoring dry, damaged skin.

Decreased ceramide levels is a major etiologic factor in skin diseases such as atopic dermatitis. Therefore, topical ceramide supplementation may provide opportunities for controlling this deficiency and improving skin conditions.¹

*Epidermotrophic refers to stripping the outer keratin layer, smoothing the skin and helping to bring order to epidermal turnover time.

glycoZoo™ Wet Wipes/Dry Bath

Easy to Use, Client Convenience

USES: Spot Cleaning & Aids in topical treatment

Available 50 count wipes/jar

glycoZoo™ Otic

Multi-cleanse solution, pH adjusting

USES: Designed for routine ear/skin cleaning

Available in 4 ounce and 16 ounce sizes
