

glycOat™

Soothing Shampoo and Conditioning Spray with 1% Glycolic Acid & 2% Oatmeal Extract

All pets benefit from the use of topical moisturizing agents.

Even animals without skin problems can suffer from dry, itchy skin. This is usually caused by dry environmental conditions such as those created by air conditioning or central heating which lead to increased transepidermal water loss.

Dogs and cats with sensitive skin are thought by some authorities to have defective epidermal barrier function which contributes to the scaling and dryness on the skin often noticed by owners.

GLYCOLIC ACID: Keratolytic: smoothing and softening the skin; Lipolytic; Epidermotrophic;¹ Improved over older alpha-hydroxy acid (lactic) formulations.

OATMEAL EXTRACT: Softens and hydrates the skin.

GlycOat™ Shampoo

INDICATIONS: A soothing and nourishing general cleansing shampoo for use on normal, dry, oily, scaly skin and/or coat.

Includes **CERAMIDES** to aid in moisturizing, repairing and restoring dry, damaged skin. Phosphate, paraben and DEA Free.
